Long/Beulah Roads Sewer Replacement Project

The Municipality of Penn Hills is initiating a project to replace the sewer pipeline along Long and Beulah Roads in July through early November. This project is mandated by the PA Department of Environmental Protection to reduce basement backups and sewer overflows. The existing 15 inch sewer line is being replaced with a 24 inch line which will run down Long Road from Seneca Field to Fairway Lane. The sewer line replacement will continue up Fairway Lane to Beulah Road. On Beulah the new sewer line will proceed up the side of Beulah Road, across Penny Lane, bore under Beulah Road and up the side of the Churchill Country Club for approximately 525 feet.

On July 27th, Long Road will be closed except for local traffic from the Long Road EQ plant/Pat Seneca Memorial Field entrance to Fairway Lane. A posted detour will be in place. The Road will be closed for approximately one to two months to replace the sanitary sewer in that area. The entrance to Seneca Field and Fairway Lane will remain open. Once the Long Road portion of the project is complete, the Road will be reopened.

We apologize for any inconvenience during this major Municipal infrastructure improvement project.
